

BED BUILDING

101

SUPPLIES

- (7) 2x4's
- (1) sheet plywood
- (2) 2/3" wood screws
- (1) 5/8" wood screws
- (4) casters or similar wheels

DIRECTIONS

1. Cut plywood 6'x3' section. Be sure to save extra for head and foot boards.
2. Cut (2) 2x4s into 6' sections for the platform frame. (Be sure to keep remaining 2' to brace back post to side.)
3. Create back posts (2) by cutting (2) 2x4's into 4' sections.
4. Create front posts (2) by cutting (2) 2x4's sections from Step 2 in half (2')
 - a. Use the remaining 2-3' pieces for bracing the front and back of platform frame (about 3')
 - b. Use the remaining 1' pieces as added blocking for front/back posts to attached the caster wheels
5. Drill together (2) 4' sections to make the back posts
6. Drill together (2) 2' sections to make the front posts
7. Cut out corners of plywood (6'x3') to allow for brace and fit the posts (roughly 5"x3.5")
8. Create platform base by drilling 2-6' sections and 2-3' sections together in a rectangle and attach to the plywood base with (1) 5/8" screws
9. Fit front and back posts through the windowd in the plywood base.
10. Cross-brace the front and back posts between posts and drill together with (2) 1/2" screws.
11. Add a brace from the back post to the side on both sides of the bed frame.
12. Add extra plywood pieces as the head and foot boards.
13. Add extra 2x4 blocks to bottom of posts to allow base on which to add casters.
14. Decorate.
15. Race!
